## Gin

**Gin** is a spirit which derives its predominant flavour from juniper berries (*Juniperus communis*). From its earliest origins in the Middle Ages, gin has evolved from a herbal medicine to an object of commerce in the spirits industry. Gin was developed on the basis of the older jenever and became popular in Great Britain when William of Orange, leader of the Dutch Republic, occupied the English, Scottish and Irish thrones with his wife Mary. Gin is one of the broadest categories of spirits, represented by products of various origins, styles, and flavour profiles that all revolve around juniper as a common ingredient.

# Tonic Water

**Fever Tree** - Quinine is the key ingredient, and the essential bitterness, in tonic water. The brand name Fever-Tree was chosen as it is the colloquial name for the cinchona tree, the bark of which produces quinine. After much research, a specific type of fever tree plantation located on the Rwanda/Congo border, was found to be producing the purest quinine in the world. For Charles and Tim, there was no other option but to source Fever-Tree's quinine from this plantation - the only drinks company to be doing so.

**Premium Indian Tonic** - blending luscious botanical oils with spring water and quinine of the highest quality from the 'fever trees' from the eastern hill ranges of the Democratic Republic of Congo, we have created a delicious, award-winning tonic water.

**Elderflower Tonic** - blending the essential oils from handpicked English elderflowers with quinine of the highest quality from the 'fever trees' of the Democratic Republic of the Congo, we have created a delicious, floral variation of our Indian tonic water.

**Naturally Light Tonic** - blending of subtle botanical flavours with spring water and highest-quality quinine gives it the distinctively clean, crisp character of Indian Tonic Water, but with 46% fewer calories.

**Cognac** for a brandy to bear the name Cognac, it is exclusively produced in the wine-growing region surrounding the town of Cognac and its production methods must meet certain legal requirements. In particular, it must be made from specified grapes. The brandy must be twice distilled in copper pot stills and aged at least two years in French oak barrels.
