DISCOVER SCOTLAND

*Scottish whiskies are among the world's most revered spirits.
There are varying styles, though all can be delectable masterworks in their own right.
Some are flavoured heavily by peat and smoke, others are light and fruity.
Coastal whiskies are often flavoured by the sea and a refined salinity can be found.
There is always a sweetness; sometimes in omnipresence, sometimes lurking in the substrata.*

There are regional distinctions in Scotch malt whisky much like the wine appellations of France. The robust, aromatic clarets of Bordeaux can be paralleled with the pungent, powered single malts from the Highlands. The sweet, fragrant, floral whites of Alsace are comparable with the gentle, fruity expressions from the Lowlands.

*The profusion of Scotch whisky distilleries is such that it is difficult, and unwise, to make broad generalisations.
To truly master the subject, one must first embark on
a lifetime's journey - a journey of knowledge, history and experience.*

SPEYSIDE

Speyside proffers the lighter, sweeter drams.

*Body is brought with age and some of the heavily sherried,
well-aged Speyside single malts are particularly full.*

The lighter, younger whiskies can be rather delightful with superb balance.

*The sweetness is often honeyed and delicate and peat is rarely used,
nor are the drams particularly salty.*

Speyside whiskies are rarely finished in exotic wood.

HIGHLANDS

The Highlands is a broad appellation, though the whiskies tend to be full in body.

The Highlands is divided into four regions;

Northern Highland whiskies are full, cereal sweet and rich;

Southern Highland whiskies are slightly lighter with dryness and fruit;

Eastern Highland whiskies are full, dry and very fruity;

Western Highland whiskies are full and pungent with plenty of peat and smoke.

LOWLANDS

Whiskies from the Lowlands tend to be light and gentle.

The single malts are usually quite dry. Peat is very rarely used.

The single malts are soft and delicate and triple distillation is practiced, indeed it is for this that the region is known.

There is very little salinity and plenty of floral notes and balanced fruit.

CAMPBELTOWN

Campbeltown single malts are rather dry and gentle smoky.

The proximity to the coast proffers a salty character.

*One can imagine a cross between the Western Highlands and the Lowlands,
with a little salinity.*

ISLAY

Single malts from Islay tend to be the most pungent and peaty of all Scotch whiskies. This is particularly true to the south of the isle, where peat smoke is rife, as is tar and salinity. Further north there is not quite the peaty intensity; instead there is often plenty of fruit and refinement.

Smoke is a recurring theme, as is balance and richness.

for the terroir and production methods differ greatly between distilleries.*

USA

American whiskeys may often be categorised as pertaining to toastiness, spice and vanilla sweetness. This is in large part due to the generous use of new charred oak (predominant in most styles of US whiskey, and used exclusively in the production of bourbon), which lends stunning sweet flavours such as vanillin, and other flavour compounds.

JAPAN

*Japanese whiskies are crafted in the Scottish style.
We find they lie between Lowland and Speyside in style.
Delicate and perfumed with honeyed sweetness.
One regularly hears them described as being smooth, but that is
doing them an injustice. Light sherry and floral notes,
sometimes they have been peated for a smoky, quasi Islay style.*

IRELAND

Irish whiskeys are often thought to be smooth, fruity, and triple distilled and many of them are, but this isn't the full story. The Irish are widely credited as being the first to distil whiskey, though this is strictly contested by the Scots. The Irish are unique in their pure pot still whiskey.

SWEDEN

In a world of whisky newcomers following a recent boom in distilling, comparatively, Sweden can be considered one of the more experienced countires and they do not try to be a copy of other whiskies. Since 1999, they've been putting together blends and perfecting the craft of creating their own, unique Swedish Whisky.

Character profiles typically consist of fresh vanilla, fragrant mixed herbs and underÅ tones of oak, all of which combine to result in a smooth-drinking spirit.

INDIA

Indian whiskies are known for their fruity, spicy and malty character. 6-row barley impart a spicier character that many Indian producers think it better. Hot and humid climate proffers a speedy maturation and it is for this reason that we see no age statements; most expressions are only a few years old.

TAIWAN

Taiwanese whiskies generally possess a character profile that is rich and fruity, with notes of cloves, cinnamon, walnut, fudge and marzipan. Despite these decadent and bold flavourings, whisky from Taiwan is actually superbly well-balanced and light, making Taiwanese-produced whiskies an absolute pleasure to enjoy.
